## NEW WESTMINSTER CITY BY-LAWS.

### WATER WORKS REGULATION BY-LAW, 1893.

#### *A By-law to regulate the Water Works of the City of New Westminster.*

WHEREAS a by-law was passed by the Council of the said city on the 14th day of November, 1889, for the election of Water Commissioners for the construction and management of a system of water works for the city :

And whereas the said water works have been constructed and operated under the provisions of the said by-law until the 28th day of November, 1892, when a by-law was passed repealing the before-mentioned by-law :

And whereas it is necessary to make other provisions for the maintenance, management, and operation of the said water works, and for such extensions thereof as may become necessary :

Therefore the Municipal Council of the Corporation of the City of New Westminster, by virtue of the powers vested in it by the Acts relating thereto, enacts as follows :—

1. It shall be lawful for the said Council from time to time to fix the prices, rates, or rents to be paid by consumers for the use of the water supplied to them from the city water works, and such rates when so fixed shall not be increased to any consumer unless and until such consumer has received from the Council one month's notice in writing of the proposed increase.

2. The prices, rates, and rents shall be those mentioned in Schedule A annexed to this by-law, and the same shall be due and payable at the City Treasurer's office, in the City Hall, or to any person authorized by the Council to receive the same, on the first day of each month for the month preceding.

3. Any person paying water rates within ten days after the same shall have become due shall be entitled to a rebate of twenty per cent. upon the amount thereof.

4. In the case of the non-payment of water rates for thirty days after the day upon which they shall have become due and payable, the Council may cut off the supply of water from the premises of the consumer without notice.

5. The Council may use water meters, and may refuse to supply water to any premises unless the person requiring the same shall provide, place, and maintain in a suitable position in the premises a meter affixed by the Council, or its agents, and every owner, tenant, or occupant shall give every facility for the introduction, protection, and examination of any such meter, and no meter shall be used by any person in connection with the water works unless authorized by the Council.

6. Whenever any person refuses to pay for water as registered by the meter within thirty days after a statement of the amount due has been served upon him, or mailed to him in the post office of the city, it shall be lawful for the Council to shut off the supply of water, and in every such case to charge the same rate or rent and collect as per scale of rates for the water supplied as if no meter had been used, and the premises thereafter, while held by the same occupant, shall be subject to the same rate as if no meter had been ever introduced, and in all cases where the meter indicates that no water has been used, it shall be lawful to charge and collect the same rates as if no meter had been introduced.

7. It shall be lawful for the Council to shut off and withhold the supply of water from all premises where any of the provisions of this by-law, or any regulations relating to the water works, have in any manner been violated, and the supply of water shall not again be turned on except upon a rectification of the cause of the turning off and withholding the same, and on satisfactory assurance being given that no further breach of existing regulations adopted by the Council shall occur.

8. Applicants for water shall give a full and correct statement, on the form provided by the Council, of the size and description of their premises, and the number of inmates, the various uses to which the water is about to be put, the number and description of fixtures required, and all other information that may be required in order that a correct estimate of the charge to be made against them may be arrived at.

9. Notice in writing shall be given to the Council and its consent in writing obtained before any proprietor desiring to use water necessary for any bath, water closet, or otherwise requiring an additional

supply of water, will be allowed such additional supply, or before any change or addition is made to the number or description of fixtures on any premises.

10. The use of the water shall not be granted for any special purpose unless, in addition to the special rate therefor, the ordinary rating of the building be also paid.

11. Any person vacating any premises that have been supplied with water from the city mains, or who is desirous of discontinuing the use thereof, must give ten days' notice of the same at the Treasurer's office, otherwise he will be liable for the rates thereof; and whenever water has been turned on to any house or building the owner or occupier thereof shall be liable for the payment of the water rate so long as such house or building is occupied.

12. No closets, except such as are of a pattern or action approved by the Council, will be permitted in connection with the water works.

13. In cases in which it may be desired to discontinue the use of any fixtures or attachments before the rate that is payable therefor can be remitted, such fixtures or attachments must be completely cut off and detached from the water supply to the satisfaction of the Engineer, and no person shall re-attach the same without giving notice at the Treasurer's office.

14. All persons having fixtures and attachments for fountains, hose, and lawn sprinklers will be held chargeable with the rate thereof whether the same be actually used or not, subject, however, to the conditions of the next preceding clause.

15. In case of leaky or improper pipes or fixtures in premises the Engineer shall have authority to cut off the supply of water by shutting the stop-cock, or by detaching the service pipe from the main, and before the water is again turned on the pipes and fixtures shall be repaired and altered as required, and the cost of detaching and re-attaching, or of turning off and on the water, shall be paid by the person occupying or owning the premises, and no person supplied from the service pipe shall have any claim against the Council by reason of the cutting off of the water.

16. Applications for the laying of service pipes, or of turning on or off of the water to premises, shall be made in writing at the Treasurer's office in the City Hall.

17. Upon the receipt of an application from the owner or occupant of any premises the Council will provide and lay down an ordinary house service from the main to the street line or boundary when, in the opinion of the Engineer, such service is necessary, but the expense of distribution of water through buildings, or parts of buildings, shall be borne or paid for by the proprietors, tenants, or occupants thereof, and for each such connection from the main the Council shall be entitled on and after the 1st day of August, 1893, to demand and receive from the applicant a sum not exceeding \$5.

18. Only the ordinary house service pipe for the supply of any single house or premises shall be laid by the Council for the sum mentioned in the next preceding section, and any person desiring more than such service for the supply of his premises shall, subject to the approval of the Council, be supplied with the same, and shall be charged with the extra cost, but such extra service shall only be laid upon the condition that all connections in such house or premises shall be detached from any existing service or services, and attached to such extra service by such person whenever the Council shall so direct.

19. Any person making application for the laying of service pipes other than ordinary house services from the main to the street boundary shall, at the time of making such application, deposit with the Treasurer a sum equal to the cost of providing such service, such cost to be determined by the Engineer, and upon receipt of such sum the Council may provide and lay such pipe.

20. The Council shall in every case determine the size of the pipe to be used in supplying any premises, and also the position in the street in which it is to be laid.

21. When any departure from the prescribed rates is permitted in order to accommodate a consumer, the consumer shall be charged with the expense of making the change.

22. No work of any kind connected with the water services, either for the laying of new or the repair of old services, shall be permitted to be done upon or under the streets by any person other than an employee of the Council.

23. No work shall be done by the Council upon the premises of a consumer except the placing of meters,

but the Council may direct all work to be done in connection with the water services, and, if so desired by a consumer, may lay the service pipes over all the vacant space intervening between the street line and the buildings on the said premises, and may charge for the same as provided by these regulations.

24. Any directions as to the position in which it may be desired to have the service pipe laid, when such directions do not interfere with the requirements of the Council, will be complied with when given in writing at the Treasurer's office, and the applicants shall be notified of the time at which the service pipe is to be laid.

25. If any person so notified as above shall fail to appear at the time appointed for laying the service pipe, the work may be proceeded with in the ordinary way, and any subsequent alterations shall be made at the expense of the consumer.

26. In all cases the consumer must show that the pipe laid within his premises is laid in accordance with the requirements of the Council, and unless the same is shown to the satisfaction of the Engineer, Inspector, or Foreman in charge of the work, connections shall not be made with the street pipe.

27. Unless by special and express arrangement no two premises supplied with water from the city mains shall be dependent upon one service pipe beyond the street line, but each separate and distinct tenement or premises shall be supplied through a separate pipe provided with proper stop-cock or other means of cutting off the water.

28. All service pipes upon the premises of consumers must be laid to a depth of not less than thirty inches below the level of the surrounding ground, and where the trench crosses or approaches other excavations the pipe must be properly protected by boxing or otherwise, and each service must have private stop and waste cock.

29. All consumers must keep their service pipes, stop-cocks, and other fixtures on their own premises in good repair and order, and protected from frost, at their own expense.

30. All plumbers' work in any house, store, office, building, or part of building, must be done in a workmanlike manner with good materials, sufficiently strong to resist the pressure of the water, and all taps used for the drawing or shutting off of the water must be of a design approved by the Council or its duly authorized officers; and should any of such work or material be not so approved, it shall be lawful for the Council or its officers to turn off, or refuse to turn on, the supply of water.

31. No contractor, builder, or other person shall use for building purposes of any kind or description any water from any pipe or main of the water works without a written permission of the Council or one of its officers, nor until the rate fixed by the regulations in force at the time have been paid, and all rules made for properly protecting the supply pipe have been complied with.

32. No person shall destroy or injure, or in any manner tamper with, any hydrant or other fixture or property of the City Water Works.

33. No person shall obstruct at any time, or in any manner, the access to any hydrant, valve, stop-cock, or other fixture connected with the water works; and should any person obstruct access to any such fixtures by placing thereon or near thereto any brick, stone, timber, or other material, the Engineer, or other authorized agent of the Council, may remove such obstruction at the expense of the offending person.

34. All officers authorized by the Council for that purpose shall have free access, at proper hours of the day, and upon reasonable notice given and request made, to all parts of every building in which water is delivered and consumed.

35. Any inspector of the water works department may make personal inspection of all pipes and taps used for distributing water in any building in the city, and if any be found leaky or defective, or if any waste of water is found to exist, notice will be given to have the defects remedied, and if they are not so remedied within twenty-four hours from the service of such notice, the water supply may be turned off.

36. No proprietor, tenant, occupant, or inmate of any house, store, office, building, or part of building, supplied with water from the city mains, shall vend, give, or dispose of such water, or permit such water to be taken away, or use or supply such water to the use or benefit of others, or to any other than to his, her, or their own use and benefit, or increase, by any device or expedient, the supply of water agreed for with the Council, or improperly waste the water, or

practise any deception upon the Council or its agents with regard to the water supplied from the said mains.

37. No person except the duly authorized agents of the Council shall tap or make any connection with the city mains, or turn off or on any service pipe stop-cock.

38. In case of any unnecessary quantity of water being used by any person, the Engineer or other agent of the Council may throttle the stop-cocks so that no more than a reasonable quantity of water can be obtained.

39. Hydrants on any street, or in the vicinity of any lumber yard, shall not be used for watering or for any other purpose by any person, except by the fire brigade in case of fire, unless special written permission be given by the Council or the Engineer.

40. No person shall in any manner interfere or meddle with the water service in any street, or make any addition or alteration whatever in or about, or turn on or off, any stop-cock without permission of the Council or the Engineer.

41. This by-law may be cited as the "Water Works Regulation By-Law, 1893."

Done and passed in open Council the 27th day of March, 1893.
